This network allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably comprises of 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, thanks to its exceptional level of product performance and their consistently high level of consumer support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division stationed in Cleveland has a expert team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a national equipment expansion project. Early sales of this manufacturing equipment focused on large business groups, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Domestic lift truck business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of substantial expansion of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This venture radically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped set up the company for the manufacture of high added-value products suitable for export. In 1993, the corporation had a international sales network and started exporting models they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
